THE SERVER

MCX-2000

THE CLIENT

MCX-A10 / MCX-SP10

Wireless, multi-room, multi-selectable music library.

■ **PC content playback**: The MCX-2000 broadens music enjoyment throughout your home with the ability to play back music files from a PC. Edit library items using the PC web browser. Also, there are tentative plans to offer Digital Living Network Alliance (DLNA) compatibility.

* Requires Windows® PC running Windows XP®.

■ **Simply wireless**: You can enjoy and control music in as many as 16 locations: one Server and 15 Clients (5 wireless plus 10 wired).

■ **Store 3000 CDs of music**: A huge amount of music is at your fingertips. The hard disk stores up to 3,000 CDs of music in MP3 format.

XM READY

■ **User friendly**: The Server has a GUI with on-screen menus and the Clients have large panel displays.

■ **Radio choicies**: FM tuner, Internet Radio compatibility and XM Satellite Radio.

■ **Create your own CDs**: You can even make your own CDs from playlists of songs you have selected.

■ **Automatic retrieval of music information**: Various information about songs, such as artist name, album name, song list and music genre can be retrieved automatically from the Internet (Gracenote® Music Recognition Service) or, if not connected to the Internet, from an internal database.

Music recognition technology and related data are provided by Gracenote®.

THE IN-WALL CLIENT

MCX-C15 / MCX-CA15S

The MusicCAST client system, MCX-C15 and MCX-CA15S, offers extensive features and flexibility.

■ **In-wall installation**: Great control within reach, yet out of the way...bring home the convenience of this intelligently integrated in-wall mountable MusicCAST Client into your living environment. With variety of installation configuration available, now every room is fully customizable to enjoy the benefits the MusicCAST music distribution system can provide.

■ **Favorites selection**: The four Favorites buttons allow direct playback of various sources. Each can be assigned the following functions: playlist, analog or digital inputs from Server, tuner presets, local Aux input from MCX-CA15S. Favorite selections can be made even when the MCX-C15 is in sleep mode.

■ **IR flasher support**: The MCX-C15 supports limited IR transmission functions for custom installation. IR signals from the MCX-C15 can be transmitted to the MCX-CA15S or the I/O Box, and can drive an IR flasher for remote control of other components. The function works on only 38kHz modulation frequency.

** IR flasher units are not available from Yamaha.*

■ **Yamaha AV link**: The MCX-C15 can generate extended IR commands to control a Yamaha AV amplifier / receiver, if more power is desired. The following functions can be controlled via the MCX-C15 remote control: volume, input selection, sleep and standby modes.

THE IN-WALL CLIENT

In-wall mountable, network ready Clients add versatility to the MusicCAST system with great new featutes such as Favorite Function buttons, IR Flasher Support and Yamaha AV Link.

MCX-C15 Distributed Audio Controller

■ Dimensions (W x H x D): 4-1/2" x 4-1/2" x 4-1/8"
